

myscouts: Create a Profile

These instructions are for creating a profile only.

Registration requires additional steps.

Who? An adult new to Scouting as a parent, volunteer or other member.
(i.e. Someone who does not already have a myscouts account.)

What? Create a personal user profile for yourself.

Why? You must have your own profile before you can register your child or yourself, and/or complete training.

Here's how:

Go to www.myscouts.ca

Click on the sentence beside number 2.

Complete the form with your personal details.

- Information is required in fields marked with an asterisk (*).
- **Date of birth** is especially important; the system uses this to identify you as an adult, able to use online Self-registration.
- The **email address** will be your userID for login so must be "unique" to you (not already used by someone else in myscouts).

Do you share an email address with a spouse/partner?

Only the first (adult) profile entered in myscouts will be able to user it.

Please consider creating a new email account for one of you so that both will be able to have accessible profiles in myscouts.

Set a password.

Click "Create Account" to complete set-up.
